## Grading Assessment TEAM 24

### Assignment 1: Grade 5%: max. 50 points

<b>Github Repository created, all team members have access</b>	no repository <i>0 points</i>	repository created and max. 2 team members have access <i>6 points</i>	repository created and all but one team member have access <i>8 points</i>	repository created and all team members have access <i>10 points</i>
<b>Team Canvas &amp; Team name</b>	no team canvas in wiki <i>0 points</i>	team canvas in wiki, poorly filled out <i>6 points</i>	team canvas in wiki, team alignment and kick-off well documented <i>8 points</i>	team canvas in wiki, team alignment and kick-off very well documented <i>10 points</i>
<b>Research</b>	no research page in wiki <i>0 points</i>	incomplete research page in wiki <i>6 points</i>	good research, well documented <i>8 points</i>	great and informative research page in wiki, very well suited to present your research to the challenge sponsor <i>10 points</i>
<b>Interviews with stakeholders</b>	no interviews with stakeholders documented <i>0 points</i>	no meaningful interviews documented <i>6 points</i>	well done <i>8 points</i>	great insights from interviews with stakeholders <i>10 points</i>
<b>Open Questions</b>	no open questions section on research page in wiki <i>0 points</i>	few (almost trivial) open questions on research page in wiki <i>6 points</i>	good open questions, well suited to get more information from the challenge sponsor <i>8 points</i>	excellent <i>10 points</i>

<b>Total Points</b>	48
<b>Comments</b>	Excellent start. Very well documented research up to this point.

### Assignment 2: Grade 2%: max. 20 points

<b>Research the problem</b>	no new research found <i>0 points</i>	research documented <i>6 points</i>	the problem was well researched <i>8 points</i>	Your wiki page shows excellent research in the problem domain. You were able to identify key sources and structure the information that you have obtained very well. <i>10 points</i>
<b>Problem statement</b>	no problem statement <i>0 points</i>	problem statement is available <i>6 points</i>	Your problem statement is understandable and documents your insight. <i>8 points</i>	Excellent problem statement <i>10 points</i>

<b>Total Points</b>	14
<b>Comments</b>	<p>The problem is well researched based on desk research and interviews. However, this is not transferred to the problem statement. The statement should be short and nail the problem. It should not detail the scenario or rephrase the broad challenge statement made available. For a problem statement, you need to analyze your research insights and then you must ask yourselves what are the real pain point(s) behind this problem? And you need to take into account the ski enthusiasts perspectives. What are their pain points that the German Ski Association in its position could offer a solution for? The problem statement should focus on the target audience and present the real problem (= the pain point(s)). Furthermore, a problem statement should not include the solution or indications of it.</p>

### Assignment 3: Grade 8%: max. 80 points

<b>Empathy map</b>	no empathy map 0 points	an empathy map is available 6 points	Your empathy map shows a good picture of your stakeholders' gain and pain points. 8 points	Excellent visualization of your challenge opportunities. 10 points
<b>Ideation</b>	ideation not documented 0 points	ideation was documented 6 points	well done 8 points	great, the ideation process is very well documented 10 points
<b>Storyboard</b>	no storyboard 0 points	A storyboard is available in your wiki. 6 points	Your storyboard shows a good scenario benefiting from your idea. 8 points	excellent 10 points
<b>Feedback to storyboard</b>	no feedback to storyboard documented 0 points	You have documented feedback collected using your storyboard. 6 points	You have collected feedback for your storyboard and you have refined your storyboard. 8 points	excellent 10 points
<b>Press Release</b>	no press release 0 points	An imaginary press release is available. 12 points	Your imaginary press release is well written using the guidelines provided in the workshop. 16 points	excellent 20 points
<b>FAQs</b>	no FAQs 0 points	Your wiki shows a short list of FAQs. 12 points	good list of FAQs 16 points	comprehensive list of FAQs, all relevant questions are answered 20 points

<b>Total Points</b>	68
<b>Comments</b>	<p>The empathy maps misses the pains and gains which leads to the identification of opportunities. Even though there some items under "feel" specially regarding pains, the available empathy map does not present a good enough picture of your stakeholders' gain and pain points. We recommend these are addressed on a specific section of the map and be more thoroughly considered.</p> <p>The ideation process is well documented through the "ideas image". The Press release followed the main guidelines and is well written. In order to be excellent the text should be longer, more concise with more details on the value proposition of the solution for the different stakeholders. The press release doesn't have a good flow as paragraphs don't blend well. I.e. the paragraphs break clearly based on the original template items.</p>

	<p>What about the sponsors of the ski federation's events. How can they benefit from your app?</p> <p>Does the app track the users on the slopes so you can find your group of friends? Can you create a group? Can you create/propose pop-meetings like meeting for lunch at specific restaurant on the slope? Can you create fun competitions among the users (e.g. collect points on a kind of fun race?!)</p> <p>Can you find users per skill level? Can people point out on their profile if they are willing to help /teach others to ski and what they want to get for it? (Novice skiers might find paid courses and private classes inflexible and expensive and maybe would be motivated to pay informally or exchange for a paid lunch, for someone with more experience to give them some tips...)</p>

<b>Comments</b>	<p>The prototype in sprint 1 is well developed for sprint 1. It is relatively easy to follow, the goal and value proposition are clear and the look and feel is very well done for sprint 1. Overall, Well done!</p> <p>Next step is to get as much feedback as possible, please reach out to any person you have access to in your personal networks that the profile of end-user, but also the profile of another stakeholder you might identify through your business model canvas.</p> <p>You wiki page is structured, but still lacks a home page and more concise text and structure for a final release. Even though you use the GitHub issues to manage your team's work, it seems mostly only 2 team-members are active managing it. It is key for virtual teams that team members are aligned in their to-dos and track the issues. Your team work does not seem balanced. Address your workload and organize yourselves to effectively collaborate in the next 3 weeks.</p> <p>Please pay attention to the grading scheme of the next assignments.</p> <p>P.s. Please note that the quizzes can be answered by December 8<sup>th</sup>. Each quiz is 30 points (3%). Hence, 15% (150 points) from your final individual grading comes from the quizzes. You have 3 attempts per quiz to reach maximum points.</p>

<b>Comments</b>	<p>The business model presents a very good business case for your solution. You opted to position yourselves as a startup and the business case presented adequate structure, context and all items were relevant and concise.</p> <p>For the final deliverable, you can still make changes and further detail it, by e.g. implementing some comments you might receive at the presentation from DSV. But, leaving as is will already give you maximum points, so you can also focus your effort on the presentation of the prototyped solution and GitHub repository.</p> <p>P.S. Please note that the quizzes can be answered by December 8<sup>th</sup>. Each quiz is 30 points (3%). Hence, 15% (150 points) from your final individual grading comes from the quizzes. You have 3 attempts per quiz to reach maximum points.</p>

<b>Comments</b>	<p>Your user testing documentation is very good and you improved your prototype from sprint 1, based on the feedback received.</p> <p>For the final deliverable, you can still work on your prototype and make changes if you would like. But, most important, you can improve overall the GitHub repository, the wiki could have a more clear structure grouping the pages into categories.</p> <p>P.S. Please note that the quizzes can be answered by December 8<sup>th</sup>. Each quiz is 30 points (3%). Hence, 15% (150 points) from your final individual grading comes from the quizzes.
